

Rural Crime Survey 2021

Survey results

Nearly 3,000 people, who live or work in the countryside, took the time to give us their views on how crime impacted on their lives, about crimes that had been committed against them, and the policing of rural communities. We undertook our annual rural crime survey in November 2021 and is part annual rural crime survey.

These results will help influence how rural policing is prioritised in rural communities and ensure that Police and Crime Commissioners, the police and other authorities understand the needs, concerns and priorities of rural communities.

<p>16% of people have considered moving or leaving their local area because of crime.</p>	
<p>48% have felt intimidated by criminality or criminals over the last year. (This includes direct threats from criminals or general criminality).</p>	
<p>25% of people know the names of their local officers and how to get in touch with them. (aside from ringing 101/999)</p>	

89% have not seen any officers in their local area in the last seven days.	
71% say the number of police officers or stations in their local area has changed since they lived there.	

Recommendations

Crime in rural areas is often the same as that experienced in urban areas, but different solutions are needed to tackle them. There are also some crimes which are unique to rural areas such as agricultural machinery theft, sheep worrying/rustling, and hare poaching, but many are not. However, the response from authorities should be just the same as to crimes that are undertaken in our towns and cities.

- **A National Rural Crime Taskforce** must be set up to ensure there is a greater understanding of the needs of rural communities by police/government and other partners to ensure the problem of rural crime is tackled and appropriate solutions are identified.

Policing in rural areas brings its own challenges with isolated, sparsely populated areas, and limited access to support services. This means that it is expensive to police on a per capita basis and, as resources come under ever increasing pressures, this is becoming more challenging. Therefore, it is essential that rural police forces receive a fair funding settlement that allows them to serve their communities and tackle crime in rural areas appropriately.

- **Review the police funding formula** to reflect the unique nature of policing in rural areas and take into account the cost of delivering services in a sparsely populated area.

The findings of this survey indicate that we have a rural population simply putting up with the crime they experience and making do as best they can while feeling that crime in rural areas is not taken seriously by the police. Offences are going unreported because of the belief that the police and the criminal justice system don't properly understand the issues that rural communities face, such as the impact on a business of being unable to operate due to theft of machinery or the impact rural isolation has on people.

- **Training** must be provided so that the unique nature and impact of rural crime is better understood by the judiciary and police, and the response they provide is reflective of the crime.

Police resources are routinely focussed on areas that have the greatest 'threat, risk, and harm' and far too often rural crime is seen as low-level crime or a crime with no victims. This is not the case. Particular challenges exist in tackling crimes that are unique to rural areas, such as poaching, farm theft and livestock rustling. Other crimes such as drug dealing, domestic abuse and burglary often present greater challenges for policing when perpetrated in a rural context.

- **Take rural crime seriously**, recognising the impact it has on the victims and communities is no less than in urban areas and that rural crime should not be underestimated but treated with the same seriousness as in any other area.
